

EASYCALC™

EASYCALC™ is a free reliable **cable sizing** tool designed for **electrical contractors, engineers, designers, and specifiers***.

How to use it:

1. Fill in the basic data for your electrical system including:
 - amperage (A)
 - power (kVA or kW)
 - length of run
 - voltage
 - number of phases
 - power factor and
 - voltage drop
2. Select the desired cable type from a selection of cable families
3. Choose the installation method and arrangement such as:
 - in air
 - in conduit
 - in cable tray
 - underground, etc.
4. View the results

EASYCALC™ is dedicated to helping you size your wire and cable with references to the Canadian Electrical Code and the methods in the IEC international standards.

Simplify your ordering procedure...

To save you a few steps, the results are linked to product availability.

EASYCALC™ is accessible on our website! **BOOKMARK IT NOW!**
