

UNDERGROUND SERVICE ENTRANCE CABLE

**Meets new Grounding requirements of the CE Code.
A single cabled solution - easier to bury and install.**

- Green grounding conductor cabled with two phase conductors (black and red) plus one full or reduced neutral conductor (white)
- Compact stranded AA-8000 series aluminum conductor material (ACM) per ASTM B801 Class B or ASTM B836 (Single Input Wire)
- Black cross-linked polyethylene insulation, with a colour-coded, flame retardant, & sunlight resistant PVC jacket on each insulated conductor
- CSA certified as RWU90 (CSA C22.2 No. 38)

Safe

Eliminates the dangerous neutral return current on the grounding conductor that has the potential for shock, electrocution, property damage and fires.

Efficient

Reduces the amount of material handling required for installation and helps drive jobsite productivity.

Now available for 100A and 200A services.

*Three phase conductor constructions are available on request.
